

PICO BOULEVARD BEAUTIFICATION

405 Freeway to Patricia Avenue

Survey / Questionnaire

The Westside Neighborhood Council (WNC) with support from Council District 5 has hired the landscape architecture firm of Kathryn Cerra Associates to assist your community to create a Master Plan and guidelines for future improvements to the street and sidewalks on Pico Boulevard west of the 405 Freeway to Patricia Avenue. The hope is to both beautify Pico Boulevard and create a more walkable environment throughout, and thus encouraging businesses and residents to make the best uses of their street.

Your ideas will help create the final guidelines for possible future work on Pico Boulevard. Your participation and the creation of a Master Plan and guidelines are important in qualifying for funding opportunities. When money for pedestrian improvements becomes available, the City will use these guidelines to prioritize improvements and to understand how you want Pico Boulevard to look.

Please tell us what you believe are the most important improvements to make to the Boulevard. Some improvements we are currently looking at are listed on the next page.

- Please rank these from 1 to 3 in importance to you, with 1 being the most important. You may rank more than one item as #1.
- Please add any other improvements you think should be considered, and also rank them from 1 to 3, as above.

We really welcome your thoughts. Please print out the following survey, fill out and fax back to us at 310 474 3417.

We will post results of this survey on this site.

Thanks for your participation!

PICO BOULEVARD BEAUTIFICATION

405 Freeway to Patricia Avenue

Proposed Improvements on Pico Boulevard: (please rank from 1 to 3, 1 being the most important and 3 the least; OK to rank more than one thing as #1; OK to not rank some things)

- _____ Additional Street Trees (a more suitable species than existing Ficus tree)
- _____ Bus Shelters, trash receptacles, community information kiosks
- _____ Benches at bus stops where bus shelters aren't possible
- _____ Landscaped bump-outs at side streets to constrict traffic speed into residential areas
- _____ Landscaped street medians at locations not in conflict with driveways
- _____ Pedestrian safety lighting at bus stops
- _____ Pedestrian lighting for entire Pico Blvd corridor or for selected sections (requires assessment vote by property owners where lighting is located)
- _____ Banners on street light poles, identifying areas of Pico Blvd or other community activities; paint existing street light poles
- _____ Public toilet
- _____ Public artwork, such as murals or other artwork
- _____ Replace broken sidewalk
- _____ Repair broken paving and potholes in the street
- _____ Enhanced paving on sidewalks
- _____ Enhanced paving at street crosswalks
